Chris,

I think we should cut our losses and scrap the tube.
This has the potential to create problems down the road.
If it wasn't a saddle hole, I have might have been more enthusiastic.

Bill/Nigel/Linda,

Just FYI.

Regards,
David

David,

We have (1) D205-634-011 skidtube where one of the fwd saddles holes was opened 0.020 too big. The tube is bent/drilled and most of the xtube spacers are installed, it was noticed while trying to install the spacer. Obviously, this hole can't be swaged as the strength and likelihood of cracking would be unknown.

The only way we could save this is if we installed a custom welded spacer at that location. Would this be acceptable. Otherwise I will have it scrapped.
